

Environmental Policy Statement

Marbocote acknowledges the social and economic significance of environmental protection and commits to adhering to the Environmental Protection Act 1990. We integrate environmental considerations into our business decision-making processes to support this commitment. To uphold our Environmental Policy, Marbocote will employ all reasonably practicable measures to:

- Comply with all applicable legal and other requirements related to our environmental aspects.
- Foster high environmental standards across all operations, including waste reduction, reuse, recycling, and disposal.
- Continually measure and improve our performance to prevent pollution and enhance environmental targets.
- Utilise resources efficiently, minimizing waste of energy, water, and other materials.
- Regularly assess the environmental impacts of our operations, staying informed of and implementing recognized best practices.

The Directors hold ultimate responsibility for the Environmental Policy, supported by the Management Representative who coordinates its implementation and monitoring. This is structured around the ISO 14001 framework, which guides the maintenance and review of our policy.

Management is tasked with communicating this policy throughout Marbocote and fostering active participation at all levels to ensure compliance with legal standards and our internal environmental goals.

All employees are encouraged to actively support the implementation and ongoing management of this policy.

This policy is communicated to all stakeholders, including customers, suppliers, and employees, and we encourage their active involvement in our environmental initiatives.

This policy is available to all interested parties upon request and is subject to regular reviews to ensure its relevance and effectiveness.

Signed: 

Title: Director
